

Effective January 18, 2022: Full vaccination or negative COVID test required to enter VSP Global US locations.

New health and safety protocols require employees, contractors/contingent workers, vendors, and guests/visitors to be fully vaccinated or engage in weekly testing to gain entry to a VSP corporate location. In addition to proof of vaccination or negative COVID test, individuals are required to complete a health screening questionnaire and thermal screening process daily before entering.

VSP is managing compliance with these requirements through the [CLEAR Health Pass](#).

- Those who are vaccinated can upload proof of vaccination.
- Those who choose not to be vaccinated and require ongoing access to a VSP building will need to engage in weekly testing at one of the CLEAR partner labs that connects their test results to their Health Pass.
- All individuals will need to complete the health questionnaire regardless of their vaccination status to gain onsite access.
- Once these activities are completed accurately, the CLEAR profile will display a “Green” health pass, enabling entry after the thermal screening process.
